<b>1. Introduction to NF-<math>\kappa</math>B signalling</b>	<b>1</b>
1.1. NF- $\kappa$ B . . . . .	2
1.2. Inhibitors of NF- $\kappa$ B . . . . .	3
1.2.1. I $\kappa$ B $\alpha$ . . . . .	3
1.2.2. I $\kappa$ B $\beta$ . . . . .	4
1.2.3. I $\kappa$ B $\epsilon$ . . . . .	4
1.3. I $\kappa$ B kinase complex . . . . .	5
1.4. Zinc finger protein A20 . . . . .	6
1.5. Mathematical models of NF- $\kappa$ B signal transduction . . . . .	7
<b>2. Methods</b>	<b>11</b>
2.1. Characterisation of dynamical behaviour . . . . .	11
2.1.1. Steady state and stability . . . . .	11
2.1.2. Characteristic time . . . . .	12
2.1.3. Deactivation time . . . . .	13
2.1.4. Maximal concentration . . . . .	14
2.1.5. Characteristic activation . . . . .	14
2.2. Sensitivity analysis . . . . .	15
2.3. Bifurcation analysis . . . . .	16
2.3.1. 1-parameter Hopf bifurcation analysis . . . . .	16
2.3.2. 2-parameter Hopf bifurcation analysis . . . . .	16
2.4. Data quantification . . . . .	17
2.5. Parameter estimation . . . . .	17
2.5.1. Parameter sampling . . . . .	18
2.5.2. Error model . . . . .	18
2.5.3. Maximum likelihood estimation . . . . .	19
<b>I. Investigating different modes of dynamical behaviour in the canonical NF-<math>\kappa</math>B pathway</b>	<b>21</b>
<b>3. Modes of dynamical behaviour in mouse embryonic fibroblasts</b>	<b>23</b>
3.1. Experimental observations of NF- $\kappa$ B dynamics . . . . .	23
3.2. Model Reduction . . . . .	25
3.3. Characterisation of the core model of the canonical NF- $\kappa$ B pathway .	30
3.4. Identification of parameters that alter the dynamical profile of NF- $\kappa$ B	33
3.5. Verification of the model insights . . . . .	36

3.6. The total NF- $\kappa$ B concentration and the I $\kappa$ B $\alpha$ transcription rate constant influence the fold change of active NF- $\kappa$ B . . . . .	39
3.7. The impact of external stimulation on the dynamics of NF- $\kappa$ B . . . . .	40
3.8. Discussion . . . . .	44
<b>II. Feedback modulation in the canonical NF-<math>\kappa</math>B pathway by post-transcriptional regulation of I<math>\kappa</math>B<math>\alpha</math> and A20</b>	<b>47</b>
<b>4. Feedback modulation in human embryonic kidney cells</b>	<b>49</b>
4.1. Motivation . . . . .	49
4.2. Experimental data . . . . .	50
4.3. Mathematical model . . . . .	52
4.4. Influence of RC3H1 overexpression and knock-down on NF- $\kappa$ B activation . . . . .	54
4.5. Experimental validation of model predictions of RC3H1 effects on NF- $\kappa$ B . . . . .	57
4.6. Dissecting the effect of RC3H1 on I $\kappa$ B $\alpha$ and A20 feedback . . . . .	58
4.7. Influence of RC3H1 expression level on NF- $\kappa$ B signalling . . . . .	61
4.7.1. Influence of RC3H1 expression levels on characteristic activation of NF- $\kappa$ B . . . . .	63
4.7.2. Influence of RC3H1 expression levels on maximal concentration of NF- $\kappa$ B . . . . .	64
4.7.3. Influence of RC3H1 expression levels on maximal concentration of IKK . . . . .	67
4.7.4. Influence of RC3H1 expression level on the maximal concentration of NF- $\kappa$ B in the absence of the A20 feedback . . . . .	69
4.7.5. Sensitivity analysis for the maximal concentration of NF- $\kappa$ B .	70
4.7.6. Influence of RC3H1 expression levels on the fold change of NF- $\kappa$ B . . . . .	72
4.8. Discussion . . . . .	74
<b>5. Feedback modulation in cervical cancer cells</b>	<b>79</b>
5.1. Motivation . . . . .	79
5.2. Experimental Data . . . . .	79
5.3. Mathematical Model . . . . .	82
5.4. Stimulation strength influences NF- $\kappa$ B dynamics . . . . .	84
5.5. Comparing dynamics of NF- $\kappa$ B in HeLa cells to HEK cells . . . . .	85
5.6. Comparing kinetic parameter and concentrations of the canonical NF- $\kappa$ B pathway estimated for HeLa cells to HEK cells . . . . .	87
5.7. Simulating post-transcriptional modulation of I $\kappa$ B $\alpha$ and A20 feedback with RC3H1 . . . . .	89
5.7.1. Influence of RC3H1 expression levels on maximal concentration of NF- $\kappa$ B . . . . .	91
5.7.2. Sensitivity analysis for the maximal concentration of NF- $\kappa$ B .	93

5.7.3. Influence of RC3H1 expression levels on the fold change of NF- $\kappa$ B . . . . .	94
5.8. Discussion . . . . .	96
<b>6. Conclusion and Outlook</b>	<b>99</b>
<b>A. Modes of dynamical behaviour in mouse embryonic fibroblasts</b>	<b>103</b>
A.1. Mathematical model published by Kearns et al. [2006] . . . . .	103
A.2. Mathematical model published by Ashall et al. [2009] . . . . .	108
A.3. Core model derived from the model published by Kearns et al. [2006]	110
A.3.1. Modified core model . . . . .	112
<b>B. Feedback modulation in human embryonic kidney cells</b>	<b>113</b>
B.1. Supplemental Figures . . . . .	113
B.2. Mathematical model of NF- $\kappa$ B activation in HEK cells . . . . .	115
<b>C. Feedback modulation in human cervical cancer cells</b>	<b>121</b>
C.1. Supplemental Figures . . . . .	121
C.2. Mathematical model of NF- $\kappa$ B activation in HeLa cells . . . . .	125
