

## Table of Contents

|  |           |
|--|-----------|
| <b>Abstract</b> .....  | <b>1</b>  |
| <b>Kurzzusammenfassung – Abstract in German</b> .....              | <b>3</b>  |
| <b>Chapter 1. Introduction</b> .....                               | <b>5</b>  |
| References .....   | 9         |
| <b>Chapter 2. Sulfonyl ynamides</b> .....                          | <b>11</b> |
| 2.0 Abstract & Graphical abstract .....                            | 12        |
| 2.1 From ynamines to ynamides .....                                | 13        |
| An accidental synthesis .....                                      | 13        |
| Versatility is key.....  | 14        |
| 2.2 Synthetic approaches to ynamides .....                         | 16        |
| A wide range of possibilities .....                                | 16        |
| Amidative cross-coupling.....                                      | 17        |
| Elimination of haloenamides .....                                  | 21        |
| Diversification via Sonogashira chemistry.....                     | 24        |
| 2.3 Solid-phase organic synthesis .....                            | 26        |
| Development of novel aluminium heating block for SPOS .....        | 27        |
| 2.4 Exploring solid-supported ynamide syntheses .....              | 30        |
| Copper catalysis using the Rink amide Resin .....                  | 30        |
| Ynamide construction on T1 linker – Issues with ditosylation ..... | 32        |
| Using diazotation to link the dichloroamide to the resin.....      | 33        |
| Using CuAAC to link the dichloroamide to the resin.....            | 34        |
| 2.5 Conclusion and outlook.....                                    | 36        |
| 2.6 Experimental .....   | 39        |
| General remarks .....  | 39        |

|   |    |
|---|----|
| General procedure GP2.1: Reductive amination of sulfamides .....                | 42 |
| General procedure GP2.2: Synthesis of ynamides by amidative coupling .....      | 42 |
| General procedure GP2.3: Deprotection of TIPS-alkynes to terminal alkynes.....  | 43 |
| General procedure GP2.4: Synthesis of 1,2-dichloroenamides from sulfamides..... | 43 |
| General procedure GP2.5: Synthesis of ynamides from 1,2-dichloroenamides.....   | 44 |
| General procedure GP2.6: Diversification with Sonogashira couplings.....        | 44 |
| X-ray Crystallographic data .....   | 69 |
| 2.7 References .....  | 77 |

## **Chapter 3. 4-Aminoquinolines ..... 81**

|  |     |
|--|-----|
| 3.0 Abstract & Graphical abstract .....                        | 82  |
| 3.1 What have 4-aminoquinolines ever done for us? .....        | 83  |
| Malaria.....   | 83  |
| Chloroquine .....  | 83  |
| 3.2 Synthetic approaches to quinolines .....                   | 85  |
| A need to overcome the current synthetic limitations .....     | 88  |
| 3.3 Electrophilically-activated amides .....                   | 89  |
| The role of the pyridine .....                                 | 91  |
| Adding a triple bond to the mix.....                           | 93  |
| 3.4 Synthesis of highly functionalized 4-aminoquinolines ..... | 94  |
| A modular approach .....                                       | 94  |
| Reaction optimization study .....                              | 95  |
| A diverse set of 4-aminoquinolines.....                        | 97  |
| 3.5 Access to deprotected 4-aminoquinolines.....               | 102 |
| 3.6 Conclusion and outlook.....                                | 106 |
| 3.7 Experimental .....   | 108 |

|   |            |
|---|------------|
| General remarks .....   | 108        |
| General procedure GP3.1: Synthesis of quinolines from ynamides and amides.....  | 111        |
| X-ray Crystallographic data .....   | 123        |
| 3.7 References .....  | 126        |
| <b>Chapter 4. Pyrazoles .....</b>   | <b>131</b> |
| 4.0 Abstract & Graphical abstract .....   | 132        |
| 4.1 Sydnonones .....  | 133        |
| 4.2 Pyrazoles .....   | 137        |
| 4.3 Syntheses of 4-aminopyrazoles via copper catalysis .....                    | 141        |
| Catalyst screen.....  | 141        |
| Attempts to expand the scope.....   | 143        |
| Deprotection of the 4-aminopyrazole .....                                       | 144        |
| 4.4 Syntheses of aminopyrazoles via strained cyclic ynamides .....              | 146        |
| Azacyclooctynes.....  | 148        |
| 4.5 Conclusion and outlook.....   | 151        |
| 4.6 Experimental .....  | 153        |
| General remarks .....   | 153        |
| General procedure GP4.1: 4-aminopyrazole synthesis using copper sulfate .....   | 156        |
| General procedure GP4.2: 4-aminopyrazole synthesis using strained ynamides..... | 156        |
| X-ray Crystallographic data .....   | 173        |
| 4.7 References .....  | 175        |
| <b>Chapter 5. Axially chiral dibenzo-1,3-diazepines .....</b>                   | <b>179</b> |
| 5.0 Abstract & Graphical abstract .....   | 180        |
| 5.1 The benzodiazepine family and their potential .....                         | 181        |
| A short perspective on the history of benzodiazepines .....                     | 181        |

|  |            |
|--|------------|
| The rise of the <i>N</i> -heterocyclic carbene .....   | 182        |
| A need for innovation – issues with existing diazepine syntheses .....                         | 183        |
| 5.2 Synthesis of axially chiral dibenzo-1,3-diazepines: amination formation .....              | 188        |
| Sometimes all you need is a strong vacuum .....  | 189        |
| The acetal linker .....  | 189        |
| 5.3 Synthesis of axially chiral dibenzo-1,3-diazepines: biaryl bond formation .....            | 195        |
| Biaryl bond formation .....  | 195        |
| Direct arylation .....   | 197        |
| Axial chirality .....  | 200        |
| 5.4 Expanding the scope to mixed heteroacetals .....   | 203        |
| 5.5 Conclusion and outlook .....   | 205        |
| 5.6 Experimental .....   | 209        |
| General remarks: .....   | 209        |
| General procedure GP5.1: <i>N</i> -(methylthio)methylation of <i>N</i> -phenylacetamides ..... | 211        |
| General procedure GP5.2: formation of <i>N,N</i> -aminals and <i>N,S</i> -acetals .....        | 211        |
| General procedure GP5.3: formation of <i>N,O</i> -acetals .....                                | 212        |
| General procedure GP5.4: biaryl formation .....  | 212        |
| X-ray Crystallographic data .....  | 221        |
| 5.7 References .....   | 223        |
| <b>Chapter 6. Summary .....</b>  | <b>229</b> |
| <b>Annexes .....</b>   | <b>231</b> |
| List of abbreviations .....  | 231        |
| Curriculum Vitae .....   | 235        |
| List of publications .....   | 237        |
| Acknowledgements .....   | 239        |
