

Contents of this book

The analysis of off-grid renewable electricity generation systems for a community in Sokoto State, Nigeria

by Yvonne Ayaribil, Daria Bykova, Georgi Kazandzhiev and Fernandina

Celine Setiawan..... 1

Implementing sustainable domestic biogas projects in rural Tambacounda, Senegal

by Julia Kostin, Marie Strauss and Nika Tavčar 135

Table of Contents

<i>List of Figures</i>	5
<i>List of Tables</i>	7
<i>List of Abbreviations</i>	9
<i>Abstract</i>	13
1 Introduction	15
2 Literature Review	21
2.1 Background of Nigeria	21
2.1.1 Geographical and demographical overview.....	21
2.1.2 Political background.....	24
2.1.3 Economy.....	25
2.1.4 Policy and Regulatory Framework.....	27
2.1.5 Nigeria’s current electricity scene.....	29
2.2 Background of the State of Sokoto	30
2.3 Technical overview of renewable energy generation systems	31
2.4 Off-grid renewable energy projects	34
2.4.1 Successful Projects.....	34
2.4.2 Failed projects.....	35
2.5 Process and barriers to new technology adaptation	36
2.5.1 Technology diffusion.....	36
2.5.2 Barriers to the implementation of renewable energy (RE) projects in Nigeria...	37
2.6 Criteria in renewable energy projects decision-making	39
2.6.1 Financial criteria.....	39
2.6.2 Sociopolitical criteria.....	40
2.6.3 Environmental criteria.....	41
2.7 HOMER Pro Software	43
3 Methodology	45
3.1 Village modelling and load assessment	45
3.2 HOMER Pro simulations	45
3.3 Multi-Criteria Decision Analysis (MCDA)	52
3.3.1 Scoring method.....	55
3.3.2 Financial Criteria.....	55
3.3.3 Social criteria.....	56

3.3.4	Environmental Criteria	57
4	Results.....	59
4.1	Village profile and load	59
4.1.1	Village profile.....	59
4.1.2	Village electricity load profile	60
4.2	HOMER Pro results	62
4.2.1	Wind with lead acid batteries.....	62
4.2.2	Wind with Lithium-Ion batteries	62
4.2.3	Diesel system	63
4.2.4	PV and Lead Acid Battery system	65
4.2.5	PV and Lithium-ion Battery system	68
4.2.6	PV-Diesel hybrid and lead acid batteries	70
4.2.7	PV-Diesel hybrid with Lithium Ion batteries.....	75
4.3	AHP and scoring results.....	79
4.3.1	Main criteria weighting.....	80
4.3.2	Subcriteria weighting and resulting system performance	81
4.3.3	Social criterion.....	85
4.3.4	Environmental criteria	90
4.3.5	System performance in main criteria	96
5	Discussion.....	99
5.1	Comparison of PV-Diesel/Li-ion with other systems.....	99
5.2	Other aspects of this electrification project.....	101
5.2.1	Next steps	101
5.2.2	Training system	101
5.2.3	Prepaid system.....	102
5.2.4	Financials.....	102
5.2.5	Exclusion of wind system	104
6	Limitations and shortcomings	105
7	Conclusion.....	107
	List of References.....	109
	Appendix.....	131

Table of Contents

<i>List of Figures</i>	141
<i>List of Tables</i>	141
<i>List of Abbreviations</i>	143
<i>Abstract</i>	147
1 Introduction	149
1.1 Energy Poverty in Sub-Saharan Africa and Senegal	149
1.2 The Biogas Sector in Sub-Saharan Africa: A Brief Overview	150
1.3 Biogas in Senegal: Opportunities Abound	150
1.4 Past and Present: Biogas Development in Senegal	151
1.4.1 Biogas from the past: A brief history of the biogas sector in Senegal	151
1.4.2 Current state of the national biogas program	153
2.5 The Case for Biogas in Rural Communities of Tambacounda, Senegal	
154	
2 Methodology	157
2.1 Research Objective	157
2.2 Research Design	158
2.2.1 PESTEL analysis	158
2.2.2 Semi-structured interviews	158
2.2.3 Results	159
3 Analysis	161
3.1 Political Factors	161
3.1.1 Political power and governance structures.....	161
3.1.2 Civil society and private sector involvement	162
3.1.3 Political commitment toward renewable energies	164
3.1.4 Environmental governance	166
3.2 Environmental Factors	169
3.2.1 Geographical location.....	169
3.2.2 Climate and weather conditions.....	169
3.2.3 Climate change	170
3.2.4 Importance of forest and deforestation	171
3.2.5 Pollution.....	172
3.2.6 Land use patterns	173

3.3	Social Factors	174
3.3.1	Social groups and their agricultural practices	174
3.3.2	Households	176
3.3.3	Education	176
3.3.4	Household buying decisions	177
3.3.5	Health and social issues related to the use of traditional fuels	177
3.3.6	Awareness and acceptance of biogas technology	179
3.4	Technical Factors.....	181
3.4.1	Domestic biodigesters.....	181
3.4.2	Substrates.....	183
3.4.3	Co-digestion.....	184
3.4.4	Grazing systems.....	185
3.4.5	Water usage	187
3.4.6	Materials, installation, and maintenance.....	187
3.4.7	Operability	190
3.4.8	Technical capacity	192
3.5	Economic Factors	193
3.5.1	Economic development of the region	193
3.5.2	Sufficient active demand	193
3.5.3	Willingness to pay (WTP)	194
3.5.4	The market for existing domestic cooking fuels	194
3.5.5	Financing	195
3.5.6	Potential to use bio-slurry	196
3.6	Legal Factors.....	198
3.6.1	Land tenure, decentralized jurisdiction and customary law	198
3.6.2	Emergency and disaster preparedness legislation	200
3.6.3	Dairy industry legislation.....	200
3.6.4	Participation in international agreements on climate change.....	201
3.6.5	Labor and employment legislation for NGOs.....	202
3.6.6	Anti-corruption legislation.....	204
4	Results.....	207
4.1	Critical Success Factors	207
4.2	Promotion and Communication	209
4.3	Financing Scheme	211
4.4	Household Selection and Installation Requirements.....	214

4.5	Technical Training and Employment	217
4.5.1	Training of trainers	218
4.5.2	General Training Sessions	218
4.5.3	Long-term Monitoring and Employment	219
4.6	Community Development	220
5	<i>Conclusion</i>.....	223
6	<i>Discussion</i>.....	227
	 <i>List of References</i>.....	 229
	<i>Appendix</i>.....	243
